# NikNote Sample Document

## Chapter 1 - Life Processes

Photosynthesis is the process by which green plants make food.

It needs sunlight, carbon dioxide, water and chlorophyll.

The overall equation releases oxygen as a by-product.

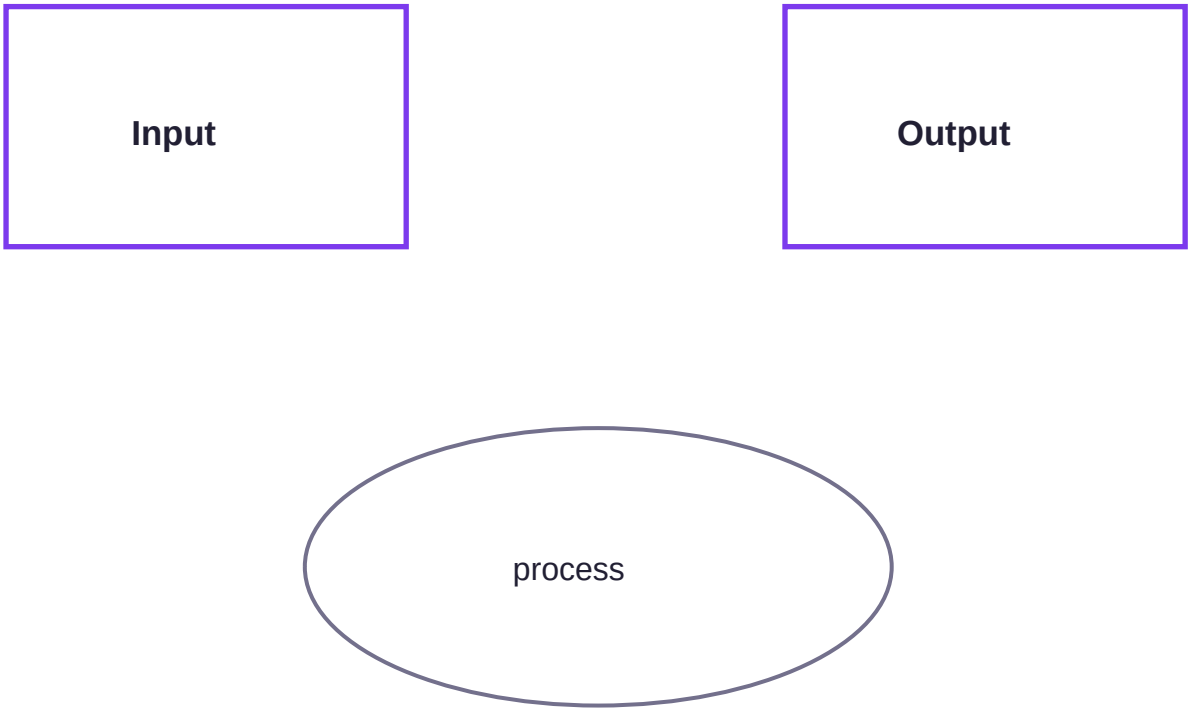
### Try these in the NikNote PDF Editor:

1. Highlight the word photosynthesis above.
2. Underline a sentence with the pen tool.
3. Add a text note anywhere on this page.
4. Sign on the dotted line at the bottom.
5. Search for the word quadratic - it lives on page 4.

**Signature:** _____

## Chapter 2 - Diagrams

Draw arrows between the boxes, circle the ellipse, tick the star box.



☐ Put a tick in the box

## Chapter 4 - Quadratic Equations

A quadratic equation has the form ax2 + bx + c = 0.

The quadratic formula gives both roots directly.

Discriminant D = b2 - 4ac decides the nature of roots.

If D > 0, the quadratic has two distinct real roots.

If D = 0, both roots are equal. If D < 0, no real roots.

Practice: solve 2x2 - 7x + 3 = 0 in the space below.

## Practice page - this space is yours

Write, draw, stamp a star when you finish.
